PROFILE

Senior software engineer and solutions architect with experience building high-traffic marketplace products, AWS serverless platforms and AI-enabled systems. I work from requirements and architecture through implementation, testing, observability and production delivery.

EXPERIENCE

Solutions Architect

CURRENT

VIETNAM INTERNATIONAL BANK (VIB)

- Translate complex business intent into buildable architectures across product, data, integration, risk and platform concerns.
- Design AI-enabled workflows with explicit ownership, controls, human review gates and observable verification.
- Build reusable systems for knowledge work, product discovery and executive communication using Next.js, TypeScript and agent workflows.

Senior Software Engineer

2020 - 2025

SMG SWISS MARKETPLACE GROUP VIETNAM

- Led epics from requirements and system design through coding, automated testing, monitoring and cross-team production delivery.
- Helped migrate legacy .NET workloads to AWS serverless services using Node.js, TypeScript, Lambda, Step Functions, DynamoDB and CDK.
- Championed Search Alert Harmonization for high-load, multi-platform core services; mentored engineers, supported hiring and represented SMG Vietnam at AWS re:Invent 2023.

Software Engineer

2018 - 2020

AS WHITE VIETNAM

- Maintained and improved seven internal products across .NET, Angular, SQL Server, Elasticsearch and integration services.
- Designed and delivered the Claim Directory application from requirements and database design through front end, back end and deployment.
- Applied clean architecture, automated testing and reusable design patterns to improve long-term maintainability.

Software Engineer

EARLY CAREER

MTI TECHNOLOGY VIETNAM / TPBANK SAVY / FREELANCE

- Delivered customer applications and production landing experiences from design and requirements through testing and deployment.
- Won first prize at the MTI Hackathon with a connected smart-garden system spanning software and hardware.
- Led graduation and freelance projects covering e-commerce, automotive listings and cross-platform mobile applications.

SELECTED SYSTEMS

01 Search Alert Harmonization

A high-load, multi-platform redesign of SMG's core search-alert system, coordinated across teams and delivered from architecture through production verification.

02 FinHome Compass

A privacy-aware decision-support product spanning strategy, React Native experience, backend contracts, AI orchestration and delivery verification.

03 AI Knowledge & Delivery Systems

Reusable Next.js and agent-based systems that turn governed knowledge into product discovery, technical artifacts and executive communication.

CAPABILITIES

AWS cloud

Lambda / API Gateway / SQS / SNS / Step Functions / EventBridge / DynamoDB / CDK / CloudFormation / Cognito / CloudWatch

AI & data systems

LLM agents / RAG / Evaluations / MCP / Human-in-the-loop / Elasticsearch / DataDog / Observability

Languages & frameworks

C# / TypeScript / JavaScript / Java / Python / .NET / Node.js / Next.js / Vue.js / Angular / React Native

Engineering practice

Microservices / DDD / SOLID / Design patterns / CI/CD / Jest / Cypress / SpecFlow / Load testing / Mentoring

CERTIFICATIONS

AWS Certified Developer - Associate

Amazon Web Services / Jan 2024 - Jan 2027

Developing Serverless Solutions on AWS

Amazon Web Services / 2022

Xamarin Certification

Xamarin / 2017

EDUCATION

Higher Diploma in Software Engineering

FPT Aptech / 2016 - 2018

Electronic Communication Engineering Technology

Ho Chi Minh City University of Technology / 2015 - 2016

Electronic Communication Engineering Technology

Cao Thang Technical College / 2012 - 2015

LANGUAGES

English - professional working proficiency

Vietnamese - native
