PROFILE

Product and business architect with a full-stack engineering foundation across retail banking, internal operations and cloud modernization. I turn ambiguous needs into secure products - from proof of concept to production - then improve adoption, economics and customer outcomes. At VIB, my scope spans executive strategy, T24 and hybrid-cloud foundations, millions-scale public channels, AI and an internal product portfolio built on AWS serverless, ECS and low-code. Earlier, I helped scale search and marketplace products for a leading Swiss proptech group.

EXPERIENCE

Solutions Architect

CURRENT

VIETNAM INTERNATIONAL BANK (VIB)

- Shape product, business and solution architecture across VIB's retail-banking, employee-product and bank-wide transformation portfolio.
- Own hybrid multi-cloud and T24 platform architecture; modernized millions-scale public channels from on-premises to AWS, EC2 to ECS and Oracle to PostgreSQL.
- Took HR Radar from proof of concept to secure production and broad adoption, reducing delivery lead time from roughly six months to two weeks.
- Architected Handover, CA document management, Mendix Internal Audit, SME InfoHub and Taskflow on serverless-first AWS and right-sized ECS patterns, cutting infrastructure cost by up to 80% versus an always-on ECS baseline.
- Led early low-code and GenAI adoption, including ViePro for MyVIB and OCR automation; advised leaders, trained teams and supported enterprise strategy activation.

Senior Software Engineer / Process Coach

2020 - 2025

SMG SWISS MARKETPLACE GROUP VIETNAM

- Built core search and search-alert capabilities for millions-scale marketplaces using Elasticsearch, performance engineering and elastic scaling.
- Led .NET-to-AWS-serverless migrations across valuation, lead and marketplace services using TypeScript, Lambda, Step Functions, DynamoDB and CDK.
- Earned the Transformation Team Award for Marketing Suite delivery; coached engineers and represented SMG Vietnam at AWS re:Invent 2023.

Software Engineer

2018 - 2020

AS WHITE VIETNAM

- Owned improvements across seven Australian financial-services products, translating operational feedback into maintainable changes.
- Designed and delivered Claim Directory from discovery and data design through full-stack implementation and production rollout.
- Applied clean architecture, automated testing and reusable patterns to reduce delivery risk.

Software Engineer

EARLY CAREER

MTI TECHNOLOGY VIETNAM / TPBANK SAVVY / FREELANCE

- Delivered web, API and mobile products across .NET, Java, Angular and Xamarin from discovery through production.
- Won first prize at the MTI Hackathon with a connected smart-garden system spanning software and hardware.
- Led small delivery teams and mentored contributors across commerce, automotive and mobile products.

SELECTED OUTCOMES

- 01 Enterprise Strategy Activation

GNM TPU / HAGT-1 business and operating architecture
- 02 VIB Cloud & Digital Channels

Hybrid cloud, core banking, public channels and AI
- 03 VIB Internal Product Platform

POC-to-production, workflow modernization and cost architecture
- 04 SMG Marketplace Transformation

Customer product and cloud modernization
- 05 FinHome Group

Free iOS home-buying decision platform

CAPABILITIES

Product & business architecture

Customer outcomes / Value discovery / Product strategy / Product portfolios / Business capabilities / Operating models / Value-risk trade-offs / Success measures

Product leadership & process coaching

POC to production / Product management / Executive advisory / Process redesign / Cross-functional alignment / Partner coordination / Team enablement / Change adoption

Cloud & intelligent products

AWS serverless / ECS / Cloud modernization / Cost architecture / Low code / GenAI / RAG / Human-in-the-loop / Integration / Observability

Full-stack engineering

C# / .NET / TypeScript / Node.js / Next.js / Python / Microservices / DDD / CI/CD / Automated testing / AWS CDK

CERTIFICATIONS

Kubernetes and Cloud Native Associate (KCNA)

Cloud Native Computing Foundation / Linux Foundation / Aug 2025

AWS Certified Developer - Associate

Amazon Web Services / Jan 2024 - Jan 2027

EDUCATION

Higher Diploma in Software Engineering

FPT Aptech / 2016 - 2018 / Graduated with Distinction

Electronic Communication Engineering Technology

Ho Chi Minh City University of Technology / 2015 - 2016

Electronic Communication Engineering Technology

Cao Thang Technical College / 2012 - 2015

LANGUAGES

English - professional working proficiency
Vietnamese - native

Cloud-native proof. Product-minded practice.

Verified certifications and structured learning across Kubernetes, AWS cloud, data engineering and applied AI.

FLAGSHIP CREDENTIALS

VERIFIED / FLAGSHIP

Kubernetes and Cloud Native Associate (KCNA)
Cloud Native Computing Foundation / Linux Foundation / Aug 2025
Credential: LF-0463wqzex4

VERIFIED / FLAGSHIP

AWS Certified Developer - Associate
Amazon Web Services / Jan 2024 - Jan 2027
Credential: bca70d04287545f0873580d0a14d7059

PROFESSIONAL LEARNING RECORD

Developing Serverless Solutions on AWS Amazon Web Services / 2022	Create Agents in Microsoft Copilot Studio Microsoft Learn / Oct 2025
Xamarin Certification Xamarin / 2017	Create and Publish Agents with Microsoft Copilot Studio Microsoft Learn / Oct 2025
Data Engineering on AWS - Foundations AWS Training and Certification / Jun 2025	Digital Literacy Capability Building Program (DCB) Vietnam International Bank (VIB) / Sep 2025
Transform Your Everyday Business Processes with Agents Microsoft Learn / Oct 2025	AI Fluency: Framework and Foundations Anthropic / 2025
